

Enviromental Packaging Information Sheet

Purpose

This information sheet provides environmental information relating to the packaging normally used by Sidastico S.p.A. for the shipment of its products. The information is provided in accordance with Regulation (EU) 2025/40 (PPWR) and the applicable national legislation.

Scope

This information sheet applies to the packaging normally used by Sidastico S.p.A. for the shipment of its products. Different materials or packaging configurations may be used to meet specific transport requirements or customer requests.

Packaging Materials Used

Component	Function	Material	Material Identification Code*	Composition	Material Recovery Stream
Pallet	Supports the transport of the packaged goods	Solid spruce wood	FOR 50	100%	Wood
Spacer block	Separates and facilitates handling of the packaged goods	Solid spruce wood	FOR 50	100%	Wood
Protective film	Protects the material surface	Regenerated low-density polyethylene (PE-LD)	LDPE 4	100%	Plastic
Stretch film	Secures and stabilizes the load	Linear low-density polyethylene (LLDPE)	LDPE 4	100%	Plastic
Protective corner	Protects package edges	Recycled polypropylene	PP 5	100%	Plastic
Protective sheet	Protects the material surface	Recycled polypropylene	PP 5	100%	Plastic
Steel strapping	Secures and retains the load	Steel	FE 40	99%	Metal

*Material identification codes are reported in accordance with Commission Decision 97/129/EC. The information provided refers to the packaging materials normally used by Sidastico S.p.A.

Disposal Instructions

Packaging components shall be separated according to their material and disposed of in accordance with the waste collection system applicable in the country or local area where the packaging becomes waste.

Always check the local regulations in force at the place of destination.

Regulatory References

- Regulation (UE) 2025/40 (PPWR)
- Commission Decision 97/129/CE

Information Updates

Sidastico S.p.A. periodically updates this information sheet based on:

- changes in applicable legislation;
- updates to suppliers' technical documentation;
- any modifications to the packaging materials used.

Traceability

The packaging used by Sidastico S.p.A. is identified and traceable through the company's internal technical documentation together with the documentation provided by the respective manufacturers, in order to ensure compliance with the requirements of Regulation (EU) 2025/40.

Declaration

The information contained in this document has been prepared on the basis of the technical documentation available on the date of issue and the information provided by the manufacturers of the packaging materials.

Sidastico S.p.A. will update this document whenever required following regulatory changes, modifications to the packaging materials used, or updates received from its suppliers.
